

THE CHARLEROI MAIL

VOL. XVIII. NO. 105.

CHARLEROI, WASHINGTON CO., WEDNESDAY, OCTOBER 17, 1917

ONE CENT

COUNCIL ADVERSE TO HAVING WATER MAIN ON SIXTH STREET

Would Have to Tear Up
Paving if Line is
Placed There

ENGINEER WILL PRESENT DATA

While the session of borough council was somewhat extended Tuesday evening a great amount of business was not transacted.

All members were present except Mr. Calvert, and the first matter to be discussed was the blockading of the sidewalk of McKean avenue by the Adams Express company. The local manager of the company was present and discussed the question with council members at length but no solution of the trouble was reached. The question had been referred by Council to the Burgess and police and the express company will have to deal with them.

While there is no disposition among councilmen or borough officials to annoy the express company in any way, it is realized that conditions as they have been in the past cannot be tolerated. Efforts are being made to remedy matters so that the traveling public will not be compelled at times to take to the street at that point in order to go back and forth on McKean avenue.

Superintendent Darby of the water company, was present, relative to the laying of a water main on Sixth street. Council members are not satisfied with the proposal of the water company to lay the line on Sixth street, between Crest and Meadow, as it would be necessary to tear up the brick paving between those points, and this the borough authorities do not view with favor. Superintendent Darby was requested to have the water company engineer present at the next meeting, with his data, to show why it is necessary to use Sixth street instead of some other thoroughfare, in order to reach the reservoir.

An ordinance relative to the vacation of a portion of Fourth street and to paving other portions, was passed on final reading and ordered printed and posted.

This concluded the business of the evening and council adjourned.

PRYOR IS SOME

TURNIP RAISER

Two immense turnips, raised by Walter Pryor of Fallowfield township were exhibited at the Mail office this afternoon, one of them weighing nine and one half pounds and the other six and one-half pounds, a total of sixteen pounds for the two. Both of the roots of this brassicaceous edible were perfectly formed and appeared to be sound all through.

LOCAL BOYS ARE PROMOTED FROM RANKS

Among the local boys who have received their chevrons at Camp Sherman, where they are now in training, in addition to those already mentioned are Ralph A. Malcolm, Edward G. Geho, who have been appointed as line sergeants in the Twenty-first company of the Sixth Training Battalion and Roy I. Carson, who has been appointed a line sergeant in Company 28, Sixth Training Battalion.

RESIGNATIONS ARE ACCEPTED

Two Local Teachers Give
Up Their Positions in the
Public Schools

NO SUCCESSORS ELECTED

A brief session of the school board was held Tuesday evening, at which time, in addition to the paying of a number of bills, the chief business to come before the members was the registration of two members of the teaching force of the schools. Mrs. Anna McLain James and Miss Johanna Estenfelder, teachers in the grades presented their resignations, which the board reluctantly accepted. These resignations will take effect on the 26th of October, the end of the second school month. No successors were elected, the board really having no applications upon which to act.

One young lady has interviewed a number of the directors with a view of securing a school, but had not made formal action. Between now and the 26th Superintendent Pollock and members of the board hope to be able to find substitutes to take the place of those who have tendered their resignations.

School teachers are hard to secure at the present time. Many districts are compelled to run short handed in this respect and for the present at least there appears to be no alleviation of the shortage.

The board having no further business before, adjourned until its next regular meeting.

The choice is between democracy and autocracy. Help preserve democracy by buying Liberty Bonds.

Innoculated As Precaution Against Disease, Marines Undergo Examination

Uncle Sam has taken every precaution in the preparation of his fighting men for the dangers of war and disease abroad. All those who are to be sent across to France have been inoculated for many diseases. In all the great mobilization camps the men are examined after each inoculation and must pass rigid physical examinations before they are ready to make the final journey overseas. This striking picture shows a group of Marines at one of the encampments being examined by physicians. Note the bandages on the arms of some of the men. They have just been vaccinated. The doctors go over every single man with the greatest care, and when finally passed upon, they are sent physically fit to the front.

FUND REACHING

MAIL'S TOBACCO FUND

Previously reported	\$76.50
N. T. Carson	.50
John Malibone	1.00
Louis Fiedler	.50
Bachelors Girls Club	5.00
Fred G. Deslimes	.25
John A. Kondasch	.25
Total	\$84.00

Soldiers help soldiers. From Gettysburg comes a letter to the Mail, enclosing the price of two smoking kits from local boys now doing service in the United States Army. They know what it is to enjoy the old familiar smokes, and they can appreciate what the feelings of those boys will be in France, if they are deprived of their favorite brand of tobacco. Fred G. Deslimes and John A. Kondasch, both from Lock Four, but now in the regular army, send these "four bits," and asks to have them credited to the fund.

Another good friend of the soldiers in France is John Malibone of Fallowfield avenue. Mr. Malibone has contributed for several kits, and may come back with more before the fund closes. He is a man of alien birth, but he is a thorough American citizen.

Another splendid contribution is from the "Bachelor Girls," most of whom, however, have left single blessedness behind them, but who ap-

next to go across. Many local boys are serving in the 110th. It is expected that they will be able to obtain it.

Today it is estimated there are over 100,000 United States soldiers in France. They have been going over quietly and safely, until today the numbers now in Pershing's great army has exceeded the hundred thousand mark. Others are on the way and more are scheduled to go. Many of your friends will likely be among the number and while the particular package you send may not reach an acquaintance it will be given to a man who will appreciate it. Every package is provided with a post card for acknowledgement and the soldier will be more than pleased to let you know he has received your contribution to his welfare. Try it.

ANNUAL MASQUERADE BALL

TO BE HELD BY P. H. C.

The committee in charge of the annual ball and masquerade of the Charleroi circle of the Protected Home Circle is arranging for one of the most brilliant social events of the season. It will be held at the Might auditorium on Friday evening, October 26.

COAL NOW BEING SHIPPED FROM THE FOURTEENTH POOL

YOUNG LADIES CIRCLE MEETS TUESDAY EVENING

Miss Leila Orange entertained the members of the Young Ladies Circle of the First Presbyterian church at her home on Third street Tuesday evening. The members of the circle decided that in the future the time would be devoted to knitting for the Red Cross instead of in working fancy work. Lunch was served by the hostess. The next meeting will be at the home of Miss Mabel Strauser on Tuesday evening, October 30.

TRUCK TRAFFIC INJURES ROADS

Freight Congestion Causes
Shippers to Use Highways
For Deliveries

ROADS ARE BADLY USED UP

Railroad congestion is having its effect on the good roads of Allegheny county in such a deleterious way that shippers are fearful of the damage to their goods. These leaflets are intended to show the damage to the roads by the use of trucks. Already it is said that teams of high hauling trucks have cut the surface of the roads to such an extent that many of them are barely passable for light hauling and quite dangerous for the ordinary tourist travel.

In an inquiry into the trouble county officials learned that many Pittsburgh coal dealers are sending coal by truck to a number of points outside the city, particularly down the Ohio as far as Sewickley, Emsworth and to other nearby suburbs, while producers of coal outside the city are adopting the same method of sending their product into Pittsburgh by trucks, and all because the railroads are unable to furnish cars to haul it. The county roads along the Ohio and Allegheny rivers seem to be the worse affected.

The same problem, but in a lesser degree, is experienced in Washington county, where heavy trucks are used in the transportation of coal and other heavy merchandise, putting the roads to a severe test. Originally the highways were not constructed with a view of carrying such heavy loads and naturally are giving way under the increased traffic which they are now called upon to bear.

G. W. Albright, Jr., was a business caller in Waynesburg Tuesday.

Old Mines Being Refitted to Take Care of the Increasing Demand

UPPER POOLS ARE VERY ACTIVE

Coal shipments by water will be made from the fourteenth pool to the Pittsburgh harbor within a few days. On Monday the steamer Crucible, owned by the Crucible Fuel company, a subsidiary of the Crucible Steel company, in command of Capt. Chas. E. Ritch, passed passed Lock No. 4 this week with three empty flats on the way to the fourteenth pool, where the craft will be loaded at the Fairmont & Clarksburg Coal company mine. These mines have not been in operation for some time, but owing to the great demand for fuel they have been refitted and made ready to ship coal by river.

The steamer Crucible is one of the largest and best boats plying the inland waters and when she arrived in the fourteenth pool made quite an excitement among the natives of that locality, as it had been many years since such a large boat had been seen on the river in that locality. The steamer Darling was the last boat to ply the upper pools, towing coal from the Parker Run Coal company to McKeesport.

The Mail is creditably informed by those in a position to know that coal development is making headway in that section of the State. The demand on the part of industries for coal is such that smaller flats can be used, and No. 7 south, as the lock have not the capacity of the new ones in use from No. 6 to Pittsburgh.

The steamer Crucible will return the latter part of the week with the three loaded craft, the coal to be used by the Crucible Fuel company, which like many other companies finds it extremely difficult to meet the demands made upon it. This demand has resulted in the increased activities reported from the upper pools, the West Virginia coal belt being reached in an effort to keep up with the consumption.

MONESSEN BOYS ENTER ARMY SERVICE

George Melville, Frank Fontanelli, Louis Shapiro and John E. Anderson were enlisted in Monessen Tuesday night by Jonas E. Gee, for service in Company A, 10th Regiment. Chas. Hazlett, of Lock Four was also enlisted for the same company.

Marble and Granite Display
Two car loads of granite and marble monuments, just unloaded, are now on display at the showroom of the M. T. Crowley Marble and Granite Works, 325 McKean avenue. 102-11.

THE NATION'S CALL

It is every citizen's duty to purchase a Liberty Bond if he is in a position to do so. Every patriot will regard it as a privilege to participate in the Liberty Loan. He will thereby contribute directly and effectively to the successful prosecution of the war which Germany has forced upon us. The Nation's task is a serious one. It intimately touches each of us. It faces you and me. If we do not win this war we must prepare ourselves for grave changes in our institutions and to lead a different sort of life from that which we had planned to live—from that which our forefathers died to give us the right to live. We shall indefinitely face the interference of the Prussian autocracy or bear permanently the intolerable burdens of militarism. To win this war we must have both men and money. I know that every farmer wants to do all in his power for the Nation in this day of trial. He will not only labor to produce the necessary foodstuffs but will also generously contribute of his means to make it possible for the men at the front to achieve victory. I am confident that the farmers of the land will not permit any other class to take the leadership in supporting the Government in this crisis, financially or otherwise.

We are at war with Germany because Germany made war upon us, sank our ships, killed our sailors, and plotted against our peace-loving friends. We were patient till offenses became so flagrant and so intolerable that it was merely a question whether we would admit we were no longer a free nation or accept the challenge of the war-mad, hypocritical and misadventurous Prussian militarists. There was one choice we could not make—we were incapable of making. We could not "choose the path of submission and suffer the most sacred rights of our Nation and our people to be ignored and violated."

We are defending our rights as a free nation. We are resolved that there shall be an end of brute force in international affairs. What Germany's victory would mean to the world is plain. There would be no right except might, no peace save at the price of humiliations too bitter to be borne. Small nations could not exist. There would be no sanctity to a pledge, no solemnity to a covenant. With the dominance of Prussian militarism, the Anglo-Saxon struggles for free institutions and liberty, persisting from Runnymede to Yorktown, with its Magna Charta, its Bill of Rights and its Declaration of Independence, will have been in vain. It is to prevent this, to defend our rights, and to make possible an orderly and just peace in the world that we are at war. The Nation calls on its citizens for high and noble service. On some it calls for service in the field; on others for service at home; on all it calls for financial support. I am confident that the farmers of the Nation will eagerly respond to the call for subscriptions to the Liberty Loan.

BOMBING THE LUSITANIA

Evidence has been produced before a New York grand jury to show that the German Embassy in this country had entered into a plot to destroy the Lusitania by placing bombs aboard her in case the U-boats failed to get her.

This comes aptly to the investigation of LaFollette and his speech. LaFollette was much disturbed because the government objected to the destruction of the Lusitania and the killing of a hundred American men, women and children aboard her.

He said this was a mere technical violation of our rights and no cause for us going to war. As a matter of fact the United States did not go to war over it, although it should have done so.

The sequel, however, shows how "friendly" was the Imperial German government to the United States at that time and how it was employing

Majestic Theatre, Today and Tomorrow

Wm. Fox presents Dustin Farnum, "THE SPY" A War Drama without a battle, written by George Bronson Howard

Almost every day newspapers reveal a new scheme of the kaiser's to disrupt the harmony of America. The workings of the 10,000 enemy secret service police are constant. Some of them claim American citizenship. Do you know your neighbor? Prices to induce every AMERICAN to see it. Children 10 cents. Adults 20 cents.

Embassy here and the men who occupied prominent places in this country as representatives, by the country of our government.

There seems to have been no end to the plotting and the nefarious scheming of their agents, and there was nothing at which they would stop. Men such as LaFollette, however, saw no cause in this for us to defend ourselves, nor for going to war. We ought to have accepted all they did as proffers of true "friendship" and we ought to have been honored that they would deign to blow us up and kill us.

Von Papan characterized us as a race of "idiots"—along with other Germans we will change his opinion when we get actively into the campaign on the western front.

FURNISHING THE WEIGHT

It is for the United States to supply the weight and the might to bring the world war to an end. France and Great Britain are holding on, and making a little progress on the western front, but the advance is very slow. There is no possibility of the war ending this fall and we can prepare for the "spring drive." Germany has not been exhausted by any means and we must not flatter ourselves that the end of the war even is in sight.

President Wilson and his administration is preparing for war on a gigantic scale. Men, money, munitions, supplies of every kind are being provided in lavish abundance, with a view of perfecting a war machine that will do the work required when the time comes. The men now in training are being prepared for the war.

It is a mere nominal thing. This is but one amount of the money that Germany has expended down to this section will come from the United States. It will take some time to get the required number of men over there, but they are going. The government gives out no word as to troop movements, but they are moving just the same.

In the meantime we must not take in any rumors of peace, or intimations that the war will end in a few months or before spring. It is our duty at this time to make preparations as if the war would never end—then we will be on the way to bring it to a successful issue.

PAYING RENT FOR TRENCHES

We are so accustomed to the picture of an utter desolation in the war regions of France and Belgium, with all the land owners and agriculturists driven away, that it is surprising to learn by the farouche way of Australia that French and Belgian farmers of the occupied territory are receiving or are supposed to receive trench rent. The Premier of New South Wales complains that Australia has not only borne the expense of equipping and transporting 350,000 soldiers, paying each of them \$1.50 a day but is paying "land rent" to the British government for the trenches in which they fight.

"This method of settling land rent," the Australian official is quoted, "is one of the most foolish practices of the war. The Belgian and French farmers and land owners, instead of going to their own governments, personally come to the British officers on the ground and haggle about trench rents and rent for other occupied territory. It is a poor business method and ought to be regularly transacted between governments. I hope the American business instinct will put an end to it." A bad business method no doubt, but it is good to know that the poor French and Belgian farmers are getting something from their ruined estates pending the time when a sufficient indemnity paid by Germany will repay them for their losses.

RELIEVING THE CONGESTION

It has been suggested that in view of the freight congestion in big terminals like Pittsburgh, a great deal of relief could be obtained by the use of the motor truck, particularly in delivering merchandise on short hauls. The motor truck has already solved the question of transportation for merchants in practically all of the towns of the

country, as it furnishes them a means of prompt and efficient delivery, which was not possible with the horse and wagon equipment.

A number of the larger houses of Pittsburgh, and the same is true of other cities of the country, send auto trucks many miles into the surrounding towns for the purpose of delivering purchases of their customers. In France, along the battle line, the motor truck is proving the salvation of the armies now in action. Without it there would be no possibility of taking care of the wants of the men.

Similarly the railroads may have to resort to some such means in order to relieve congested points. In many communities the congestion of freight is so serious that deliveries are delayed for weeks, because of the amount offered for shipment. This in connection with the shortage of labor, makes the freight question a most difficult one to handle at this time, which might find some relief if the motor truck could be utilized for short hauls.

Base ball has been put on the shelf for the season. The world's championship games are all over and the victory has been crowned with laurels and rewarded with dollars. From now on we can give more attention to the Liberty Loan.

Local politics seem to have been lost sight of, in view of the more spectacular events anticipated from day to day. And yet the time approaches when it will be called upon to take this most important

That the soldiers of the world are being fed by the citizens of the world. The boys who served in '61 know the comfort of a smoke after a hard day's campaign.

Millions of young men of America are willing to risk their lives for the preservation of our institutions. Should we be afraid to risk our dollars for the same purpose?

If there is a scarcity of fuel at the present time, what is going to happen to some communities that are already short of the desired amount of fuel when the colder weather arrives?

As to the Liberty Loans—shop early and avoid the rush.

DIVORCE NOTICE

In the Court of Common Pleas of Washington County, Pa., Phillip Forte vs. Theresa Forte subpoena sur libel for divorce. No. 155 August Term, 1917.

Notice To Respondent.

To Theresa Forte, respondent in the above mentioned case: You are hereby notified in pursuance of the Order of Court of Common Pleas of said County of Washington to be and appear in the said Court on the second Monday of November next, being the twelfth day of the month, to answer the petition of libel hereto preferred by the libellant, Phillip Forte your husband and show cause if any you have, why the said Phillip Forte should not be divorced from the bonds of matrimony entered into with you agreeably to the Act of Assembly, in such cases made and provided. Hereof fail not under the penalty of having said petition heard and a decree of divorce granted in your absence.

OLD-STYLE BLOSSOMS PASSE

Were Valuable for Home Remedies in Days of Our Grandmothers and Herb Doctors.

With the exception of some of the daintier spring blossoms, our wild flowers are passed by without comment. Violets, henbit, bluebells, trilliums are still sought after and picked, the full asters are gathered by some and the goldenrod is admired, but passing into disrepute on account of its hay-fever aggravations. There was a time, however, when grandmother was young, relates the Ohio State Journal, when most of our common field and wayside flowers were of prime importance in the household, in the shape of family bitters, physics and cures.

Yarrow, a pest to the farmer and of doubtful beauty—even to the wild flower lover, was at one time a most useful herb from which a tea was made that cured all sorts of ailments, from toothache to typhoid fever. From the boneset plant, so common along our streams now, a tea was also made which was a prime favorite in the curing of that common malady, "break-bone fever"—do not laugh—probably what we know today as gripe. Camomile, we call it dog fennel, was brewed into a tea as well, and was used as a tonic and blood purifier. Jinsoweed, a corruption of James-town weed, was valued by the soldiers of that early village as a narcotic, and is still so used, for that matter. Self-heal, the little close-growing purple-flowered pest of our lawns, was used to relieve sufferers with quinsy and other throat afflictions. This plant belongs to the mint family, and most of the mints were of use medicinally. Pennyroyal, spearmint, Oswego tea, bergamot, catnip and mother-wort were all of value to the simpler of a century or more ago.

CASTE WEIGHS AN INFLUENCE

Santals' Prefer Starvation Rather Than to Eat Food Cooked by the Brahmins.

Occupation is still preserved among the Indian natives by inheritance and tradition, so that the diversion of labor to industrial pursuits has been an almost impossible task confronting the British government, the National Geographic Magazine observes. The supply of agricultural labor constantly outruns the demand, thus keeping the wage scale extremely low. Caste also prevents people from leaving crowded districts and going to sparsely inhabited regions, of which there are many. In time of distress the restrictions which caste throws about rescue and relief work would be exasperating if they were not so tragic. For example, in the terrible Orissa famine thousands of Santals perished, in the midst of ample supplies furnished by the government, before it was discovered that there is a peculiar tenet of their faith which forbids them to touch food cooked by Brahmins. It was also discovered that skilled weavers would not go to the ordinary relief work camps for fear that the hard labor would cause them to lose the delicacy of touch which they value so highly.

A Spectacled Dog.

A short time ago, an article was widely published about a valuable hunting dog which had been fitted with eyeglasses for astigmatism. Probably most people who read it, laughed and thought it a fake.

The modern science of fitting eyeglasses, however, makes it possible to fit a dog, or any other dumb animal, with a lens which will correct its eyesight. Up-to-date methods have brought about the invention of instruments by which the error of the human eye can be accurately measured, and lenses to correct the error prescribed without asking the patient a single question. The "silent method" is very rarely used exclusively, however, except in the case of the foreigner, or our friend the dog, when no interchange of thought can be effected and the examiner must rely entirely upon the findings of his instruments.—Wellsworth Magazine.

ORDINANCE NO 351

An ordinance providing for the vacation of a portion of Fourth street, as herein described, in the Borough of Charleroi, Washington County, Pennsylvania, and for the assessment of damages and benefits therefor.

Whereas, the Burgess and Council of the Borough of Charleroi, Washington County, Pennsylvania, deem it necessary to vacate a portion of Fourth Street in said Borough hereinafter, described, now therefore,

Be it ordained and enacted by the Burgess and Council of said Borough of Charleroi and it is hereby ordained and enacted by the authority of the same:

Section 1.

That all that portion of Fourth

Street lying between the East line of Church Alley and the West Line of Lincoln Avenue, except a portion thereof Eight (8) feet wide be and the same hereby is vacated and closed and the same shall revert to the abutting and adjoining property owners in the manner provided by law.

Section 2.

The Borough Engineer is directed to note this vacation upon the General Plan of streets and alleys of said Borough and to designate said Fourth Street as an eight feet wide street or way, at the center of the present location of Fourth Street.

Section 3.

The Borough Solicitor is herein directed to petition the Court of Common Pleas for the appointment of Viewers to assess damages and benefits by reason of this vacation as provided by the Borough Code and other several laws of the Commonwealth.

Section 4.

All ordinances or parts thereof in conflict herewith are hereby repealed.

Ordained and enacted into an ordinance this 16th day of October, 1917
D. R. Duvall,
President of Council

Attest:

Ira L. Nickeson,
Clerk.

Examined and approved by me this 17th day of October, 1917.

Chief Burgess

Attest:

Ira L. Nickeson,
Clerk.

ORDINANCE NO. 352.

An ordinance providing for the grading and paving with concrete and for the sewerage or draining of Fourth street, between Church alley and Lincoln avenue and for the assessment of damages and benefits therefor.

Be it ordained and enacted by the Burgess and Council of the Borough of Charleroi, Washington County, Pennsylvania, and it is hereby ordained and enacted by the authority of the same:

Section 1.

That the Borough Engineer be hereby directed to prepare plans and specifications for the paving with concrete and for the proper sewerage or draining of that portion of Fourth street (eight feet wide) extending from the East line of Church alley to the West line of Lincoln Avenue. Said plans and specifications shall include proper and suitable steps or approaches to Lincoln Avenue.

Section 2.

Upon the approval of said Plans and specifications by the Burgess and Council, the said Burgess shall advertise for and receive proposals for the said grading, paving, sewerage and draining as provided by Ordinance No. 17, and the other proper ordinances of this Borough.

Section 3.

The said Burgess is further authorized to enter into a contract, in conjunction with Council, with any responsible persons, firms or corporations, such being the best bid or bids for said grading, paving, sewerage and draining. Bond in the sum of Five Hundred (\$500.00) Dollars, with surety, to be approved by said Burgess and Council, to be furnished providing for the furnishing of labor and material in strict conformity to and with said plans and specifications of said Borough Engineer, and under his direction and supervision.

Section 4.

Upon the completion of said work, the Borough Solicitor is directed to file a petition in the Court of Common Pleas of Washington County for the appointment of Viewers to assess damages, costs and benefits therefor.

Section 5.

All ordinances or parts thereof in conflict herewith are hereby repealed. Ordained and enacted into an ordinance this 16th day of October, 1917
D. R. Duvall,
President of Council.

Attest:

Ira L. Nickeson,
Clerk.

Examined and approved by me this 17th day of October, 1917.

S. L. Woodward,
Chief Burgess.

Attest:

DONORA TROUBLED

WITH BOY BURGERS

Donora, as well as other towns in this section of the valley, is again suffering from the acts of juvenile delinquents, a number of robberies having recently taken place in that town which have been traced to a number of boys.

The hardware store of Vernon & Hornbake, in Donora, seems to be the chief attraction for these delinquents, as this place has been robbed a number of times. The latest escapade of this kind occurred about two weeks ago, when a 32-calibre high price rifle was taken. One of the boys in Monessen was exhibiting the rifle, which he admitted had been stolen from a hardware store in Donora. Mr. Hornbake, accompanied by Chief Smedley, of Donora, went to Monessen and identified the stolen rifle, which resulted in the arrest of four youngsters by the Monessen police. It is likely they will be turned over to the juvenile court of Washington county.

Th little village of Webster, just across the river from Donora, was also the scene of a number of burglaries recently, which are attributed to a number of boys who are under suspicion by the police. The "boy problem" has been just as acute in the lower river towns as in Charleroi, where the local authorities have had considerable trouble with this phase of a very distressing situation.

SAY DEER SEASON

WILL BE GOOD

Pennsylvania is going to have a good deer hunting this fall according to reports. In some sections deer have already been reported as raiding fields and State game officials have been investigating claims of damage, most of which have been found to be exaggerated. The number of deer in the State preserves, which are closed at all seasons, is said to be greater than last year.

Deer may be shot December 1 to 15, while the quail and pheasant seasons will run from October 20 to November 30. Blackbirds are now being shot and as the migration has not started for southern countries are furnishing good hunting.

Opening of the blackbird season caused a jump in issuance of hunters' licenses but owing to the number of men who have gone to war the State's hunters will be fewer this year than for a long time.

CONNELLSVILLE ROBBERY

SIMILAR TO CHARLEROI

The postoffice at Conneltsville was robbed Thursday night, and some 300 letters taken. As in the case of the Charleroi postoffice, which was robbed Monday night a week ago, the letters were all opened by thieves who were evidently in search of money. The letters were recovered the following morning. Entrance was effected the same way as the thieves got into the local office, by climbing through a window, by breaking the glass and then raising the frame.

So far as the postoffice officials can determine, no money was taken from the office, while of course it is a question what was received from the rifling of the letters. The robbery so follows so closely the method used in Charleroi that the Conneltsville job looks like the work of the same gang that operated here.

SAYS IT IS FINE AT CAMP SHERMAN

Jacob Wise, veteran of the civil war, and friend of the soldier of today, is in receipt of a letter from William Ludwig at Camp Sherman, which the writer says:

"I suppose you have thought a lot many times since I left Charleroi that I was a very poor friend of yours but you will have to forgive me, for you know I am only a 'rookie' in this business. You have gone through it and knowing how much a fellow has to learn, it takes up a great deal of his time and when evening comes we all feel tired out and like to hit the bed early.

"Well, to start with, I am known as a 'Duck' boy. I started out being one, but have been transferred to the Brigade headquarters. We do most of our drilling with horses. When we don't have mounted drill we are out riding and when we return we have to show the route we had taken. It is certainly interesting. I always wondered why you 'old vets' were willing to go 'fight another battle.' There are just thirty thousand fellows at this camp now, more than willing to take up the battle just where you fellows left off.

"Of course you know there are a few yellow guys in this country, but there are more good sports than yellow ones, so they can let us do the job.

"The only thing wrong at this camp is that it is very dry and the city of Chillicothe is a little wet, but I haven't seen very many fellows carrying Golden Wedding on their hip.

"I see most of the fellows every evening. It was pretty hard for the first few evenings, but after that it was fine.

"If all is well I guess I will see you about Christmas, as that is the only time I want to go home. They will give us a pass for 18 hours but what good would that be when it takes us a good ten hours to reach Pittsburg.

"Give my regards to all the folks and tell them I am doing and feeling fine."

"We are all privates here and are doing as such, but with the object always before us that what we are taught, whether it be military engineering, discipline or the manual of arms, it is given us that we may be enabled to teach our men when we are put in command. We get everything that a soldier should know, but in rather a sketchy fashion, particularly in military engineering, which we are supposed to be able to pick up rapidly from our previous engineering training.

So, particular stress is laid on military training and discipline. We are taught discipline morning, noon and night, and none of us but are better for it. We drill, work and study unceasingly from morning till night and the tasks we are often given are those that every soldier must know, making up our minds, sweeping barracks, company streets, and just tonight, as the mess house waiters were 'fired' or struck, a detail from one detachment waited on table and washed dishes for about seventy men that stayed in camp over Sunday.

"I am writing in the Y. M. C. A. building, which is a large hall fitted with benches, writing tables, a piano, phonograph, etc. And on account of being assigned to barracks duty this morning I was unable to attend service.

"We have very good food. Electric lights, running water and shower baths and lots of exercise and the men seem to be very well contented, but more noticeable than anything else is the hearing of the men and attitude of our officers is the intense earnestness in everything that is done. Strictly business, make every minute count seems to be the watchword.

"I have not seen a loafer since I came; every one busy and eager to learn. I wouldn't have missed being here for anything and when we get to Washington barracks about one month from now, I expect to be more than ever glad that I am in the service.

"We are recommended by a regular army officer, and some of our instructors are regular army officers. Some are from the reserve corps and some are from our ranks who are expert in certain lines. I am determined to make good and am working harder than I ever did before."

Boyd S. Crawford,
Second Lieutenant, Belvoir, Va.

SUBSCRIBES TO LIBERTY LOAN

The American Telephone & Telegraph Company and its Associated Companies, forming the Bell System announce a subscription in behalf of themselves and their employees, for \$5,000,000 of the Second Liberty Loan. The subscription is to be allotted to localities, or sections of the country as nearly as may be, in proportion to the quotas assigned by the Treasury Department to the Various Federal Reserve Districts so that each such District will get credit for its proportionate share of the total sum. The actual subscriptions will be made in each locality by the Associated Company operating in such locality.

There is also announced the adoption of a plan whereby employees of the Companies above mentioned may purchase Liberty Bonds through those companies paying for them in weekly or monthly installments, by deductions from pay.

BALDWIN-CAMPBELL NUPTIALS PERFORMED

Tuesday afternoon at 3 o'clock at the William Penn Hotel in Pittsburg, the wedding of Miss Alberta Campbell, daughter of Mr. and Mrs. Franklin Campbell of Roscoe, formerly of Charleroi to Grover C. Baldwin, son of Mr. and Mrs. Taylor Baldwin of Belle Vernon took place. The ceremony was performed by Dr. Marsh pastor of a Pittsburg Methodist Episcopal church. The couple were attended by Mr. and Mrs. William Baldwin of Belle Vernon. Following the ceremony they left for Philadelphia where they will make their home. The bride is well known young lady and has been in charge of the offices of Dr. G. H. Smith for the past several weeks. The groom who is also well known here has been employed at Philadelphia.

TRAINING WITH THE ENGINEERS

J. S. Crawford is in receipt of a letter from his son Boyd, who is now in an Engineering training camp, in Virginia. He says:

"I have been a long, long time writing to you and as I have no worth-while excuse to offer I make none. I am in an engineering training camp at Belvoir, Va., about 25 miles below Washington, D. C., just about ten miles below Mount Vernon and right on the banks of the Potomac river.

"This camp is a branch of the American University, which is the school for U. S. Army Engineers. There are about 400 men in camp, each Company in separate barracks and the new men in detachments apart from the rest. I am a 'rookie,' having been here just a week. It would surprise you to see the class of men that are here. They are young, and comparatively speaking, old and most of them big in the engineering profession, who are making a very considerable sacrifice to come here. I feel that even though I fail to be kept in the service, I have gained a great deal by coming here, being associated with these men in the practice work in the study and in the military training.

"We are all privates here and are doing as such, but with the object always before us that what we are taught, whether it be military engineering, discipline or the manual of arms, it is given us that we may be enabled to teach our men when we are put in command. We get everything that a soldier should know, but in rather a sketchy fashion, particularly in military engineering, which we are supposed to be able to pick up rapidly from our previous engineering training.

We get everything that a soldier should know, but in rather a sketchy fashion, particularly in military engineering, which we are supposed to be able to pick up rapidly from our previous engineering training.

So, particular stress is laid on military training and discipline. We are taught discipline morning, noon and night, and none of us but are better for it. We drill, work and study unceasingly from morning till night and the tasks we are often given are those that every soldier must know, making up our minds, sweeping barracks, company streets, and just tonight, as the mess house waiters were 'fired' or struck, a detail from one detachment waited on table and washed dishes for about seventy men that stayed in camp over Sunday.

"I am writing in the Y. M. C. A. building, which is a large hall fitted with benches, writing tables, a piano, phonograph, etc. And on account of being assigned to barracks duty this morning I was unable to attend service.

"We have very good food. Electric lights, running water and shower baths and lots of exercise and the men seem to be very well contented, but more noticeable than anything else is the hearing of the men and attitude of our officers is the intense earnestness in everything that is done. Strictly business, make every minute count seems to be the watchword.

"I have not seen a loafer since I came; every one busy and eager to learn. I wouldn't have missed being here for anything and when we get to Washington barracks about one month from now, I expect to be more than ever glad that I am in the service.

"We are recommended by a regular army officer, and some of our instructors are regular army officers. Some are from the reserve corps and some are from our ranks who are expert in certain lines. I am determined to make good and am working harder than I ever did before."

Boyd S. Crawford,
Second Lieutenant, Belvoir, Va.

"This camp is a branch of the American University, which is the school for U. S. Army Engineers. There are about 400 men in camp, each Company in separate barracks and the new men in detachments apart from the rest. I am a 'rookie,' having been here just a week. It would surprise you to see the class of men that are here. They are young, and comparatively speaking, old and most of them big in the engineering profession, who are making a very considerable sacrifice to come here. I feel that even though I fail to be kept in the service, I have gained a great deal by coming here, being associated with these men in the practice work in the study and in the military training.

"We are all privates here and are doing as such, but with the object always before us that what we are taught, whether it be military engineering, discipline or the manual of arms, it is given us that we may be enabled to teach our men when we are put in command. We get everything that a soldier should know, but in rather a sketchy fashion, particularly in military engineering, which we are supposed to be able to pick up rapidly from our previous engineering training.

OVERWORKED, TIRED WOMAN TOOK VINOL

Now She is Strong and
Hearty

Philadelphia, Pa.—"I was overworked, run down, nervous, could not eat or sleep. I felt like crying all the time. I tried different remedies without benefit. The doctor said it was a wonder I was alive, and when Vinol was given me I began to improve. I have taken eight bottles and am now strong and perfectly healthy in every respect, and have gained in weight. I can not praise Vinol enough."—Mrs. Sarah A. Jones, 1025 Nevada St., Philadelphia, Pa.

We guarantee Vinol to make overworked, weak women strong or return your money. Formula on every bottle. This is your protection.

Piper's Drug Store, Charleroi and at the best drug store in every town and city in the country.

EVERY MOTHER WANTS A BOUNCING BABY

Thompson's Food (Peptonized) is peculiarly adapted to infant feeding, as it is most nearly like mother's milk. It contains all the elements so necessary to the proper growth of the infant and is the only brand of food containing in combination the food values of pure, sweet milk, select barley malt and the elements of beef juice.

If you want your baby to become strong, healthy, full of life and vigor, feed it Thompson's Food (Peptonized).

It is a complete food in itself. Very easily prepared by the mere addition of water. It is not a milk modifier. Its use eliminates the danger usually associated with the local milk supply.

We suggest that you try a 5¢ package with our guarantee of satisfaction.

A WOMAN'S BACK

The Advice of This Charleroi Woman is of Certain Value.

Many a woman's back has many aches and pains.

Often times 'tis the kidneys' fault.

That's why Doan's Kidney Pills are so effective.

Many Charleroi women know this.

Read what one has to say about it:

Mrs. Fred Jackson, 207 Prospect

avenue, Charleroi, says: "I was troubled by a constant backache. If I did

a little extra work the pain in my back was intense. I didn't rest well

at night and got up in the morning lame and stiff. If I stooped, sharp

pains caught me and I could hardly

straighten. I also had rheumatic pains

in my back and arms and I couldn't

do any sweeping. Dizzy spells and

hot flashes bothered me terribly. As

Doan's Kidney Pills had been used in

the family, I got a box at Piper Bros.

Drug Store and began taking them.

One box practically cured me."

Price 60¢ at all dealers. Don't

simply ask for a kidney remedy—get

Doan's Kidney Pills—the same that

cured Mrs. Jackson. Foster-Milburn

CRISIS OF WOMAN'S LIFE

Change Safely Passed by
Taking Lydia E. Pinkham's
Vegetable Compound.

Wagoner, Okla.—"I never get tired

of praising Lydia E. Pinkham's Vegeta-

ble Compound because during

Change of Life I was in bed two

years and had two operations, but all

the doctors and operations did me no

good, and I would have been in my

grave today had it not been for Lydia

E. Pinkham's Vegetable Compound.

which brought me out of it all right, so

I am now well and do all my housework

besides working in my garden. Several

of my neighbors have got well by tak-

ing Lydia E. Pinkham's Vegetable Com-

ound."—Mrs. VIOLA FRECAL, Wagon-

er, Okla.

Such warning symptoms as aches of

location, hot flashes, headaches, back-

aches, tiredness, nervousness, urinary

troubles, constipation, variable appetite,

weakness and dizziness should be heeded

by middle-aged women. Lydia E. Pink-

ham's Vegetable Compound has carried

many a woman through this crisis.

Indigestion. One package

proves it. 25¢ at all druggists.

CHIROPRACTIC

The Modern Science of relieving the sick and suffering. The Science that is destined to revolutionize the world in matters of dealing with the sick. The only Science that has been openly and proclaimed, also proven to all the world, beyond a shadow of doubt, that practically all diseases with but few exceptions, are due to nerve pressure by displaced bones of the spine.

PUBLIC CRITICISM

Seldom have new ideas been launched into the world, which did not first pass thru a fire of criticism. People are never ready to accept anything that is revolutionary or contrary to accepted thought or custom. Students of history as well as others know this to be a fact. Harvey, Langley, Good-year, Bell, Ericson, Stephenson, Galileo, Columbus, Mom, Palmer and many others who had brought forward new ideas, were at first greatly criticized, many having died broken hearted, for failure of the public to recognize their discoveries. Like many other new ideas, Chiropractic was also met with great opposition, but in spite of all this Chiropractic is growing so rapidly that today, it has something like 10,000 practitioners all over the world, a large institution located at Davenport, Iowa, having approximately 700 students, besides other institutions over the country. The largest institution being the Palmer School, a building estimated to be valued at \$100,000 with every equipment found in a modern college.

OPEN INVESTIGATION OF THIS SCIENCE WELCOMED

Chiropractic cheerfully invites the strictest investigation. A Science that cannot deliver the goods, would not dare ask an investigation.

Free Clinic For those who are sick and in need of Chiropractic Adjustments, but who are not able to pay, will be adjusted free of charge.

Consultation Free

MANY RECRUITS ARE SECURED

Nine more of Charleroi's boys have expressed their determination to enter the army, and expect to take their physical examination possibly this week. Then they will go to Baltimore to be sworn into the service, and from there will go to Camp Hancock, to be assigned to Company A, 110th Regiment, formerly the 10th Pennsylvania. The men enlisted with Jonas M. Gee, local recruiting officer for Company A, and their names are Peter Gris, Paul Rulung, Charles E. Hott, William Donahue, Henry Gawatsky, George Demarco, Wm. J. Brown, Anthony Sosanko, and Peter Pagani. With those volunteering from Monongahela, this makes a total of nineteen men who have been secured to join Company A within the past two days, with several prospective volunteers to hear from. Only men who have not been examined for service, or who have not been exempted for any cause, are eligible to enlist under this appeal. Any man who has been registered but not called can enlist and be sent to a military unit of his own choosing.

CHARLEROI BROTHERS HAVE BEEN PROMOTED

Word has been received in Charleroi that John Earl Hott of the 330th Infantry, N. A. Camp Sherman, has been promoted to Sergeant. It will be remembered that Mr. Hott left with the men that departed from Charleroi, September 7th, being one of the first 22 to leave this district. George Hott left just two weeks later, September 21st, and word reached here that he had been promoted to the grade of Corporal. Both brothers are in the Supply Company of the 330th Infantry at Camp Sherman. They have given very favorable reports of army life and state that it is not as near as rough as has been reported.

When a Man Changes.

Every man takes care that his neighbor shall not cheat him. But a day comes when he begins to care that he does not cheat his neighbor. He has changed his market cart into a chariot of the sun.—Emerson.

Big Market for Peanuts.

Marseilles, France, is the great central market for peanuts, more than 120,000 metric tons of peanuts in the shell and 240,000 tons of shelled nuts being crushed there in a single year.

Opposites.

We have two classes of unfortunate in this old vale of tears and laughter, those who can't get their minds on their work and those who can't get theirs off it.—Ohio State Journal.

TO SETTLE FAMILY ARGUMENT

Friendly Wagers Between Husband and Wife Serve to Quench Frequent Dangerous Quarrels.

Here is a plan by which a great many family quarrels have been averted for a certain couple. They used to quarrel all the time.

Before the wife would say:

"My dear, you'll make a mistake if you do so and so."

And the husband would reply:

"My darling, you are altogether too fussy. I know my business. Kindly let me alone, will you?"

Then would ensue a row of fearful dimensions that sometimes would shake the house, startle the servants and scandalize the neighborhood.

But now they do differently.

When they disagree they do it thus:

"Well, dear, if you think you're right, suppose you back your opinion? If I'm wrong I'll give you half a dozen pairs of gloves."

If she feels pretty confident she backs her opinion with a box of cigars, and the agreement is carefully signed by both and locked up. Then one or the other pays when the decision is reached. The young woman has an income of her own, so the arrangement is a fair one, which it might hardly be were she compelled to take her husband's own money to pay for his cigars.

Gambling is, of course, a wicked thing to do, but it checks wild assertions and smoothers, in this case, many a fire that would burn up comfort.—New York Evening Post.

MAY USE KENTUCKY STONE

Product of Blue Grass State Believed as Good and Cheap as Bavarian Article.

It is believed that after the war is over lithographic stone quarried in Kentucky may be put on the market as cheaply as the Bavarian stone which has been the principal source of supply for a long time. Small quantities of the Kentucky stone have been sold already, but the high cost of labor in this country and the difficulty of working the stone have kept it out of serious competition with the foreign product.

The European stone occurs in thin layers, which require little but planing and polishing after being removed from the quarry. The American stone is in beds from three to ten feet thick and must be sawed into thin layers before it is ready for use.

The Bavarian quarries have been worked so long that vast piles of waste have accumulated that must be moved from time to time, thus adding to the cost of production. The American quarries have found a market for the crushed refuse from their quarries, and this by-product helps reduce the cost.

The better grades of lithographic stone bring five to six cents a pound for slabs ten by twelve inches and the poorer grades a cent and a half a pound.

Difficult Language.

An intelligent Frenchman was studying the English language. "When I discovered that if I was tied I was fast, if I spent too freely I was fast, and that not to eat was to fast, I was discouraged. But when I came across the sentence, 'the first one won one guinea prize,' I was tempted to give up trying to learn English."

"OLD PARR'S" AGE BELIEVED

Said to Have Lived to Be 152 Years Old—Lived Under Reigns of Ten Princes.

"Old Parr" was an Englishman whose proper name was Thomas Parr and who broke the modern record by living to the ripe old age of one hundred and fifty-two years, an exchange says. The British cyclopedia gives an account of him:

next to go across. Many local boys

were serving in the 110th. It was

before he was captured, and he was

taken to the hospital. He was

in the hospital for some time, and

he was then sent to the hospital.

British Minister To Pope

Count De Salis, a veteran in the

diplomatic service of Great Britain,

and Minister to Montenegro since

1911, has been appointed as Minister

of Special Missions to the Pope to

succeed Sir Henry Howard, who had

held the ministry from the time of

its creation in 1914. Because of his

wide diplomatic experience in the

foreign service, Count De Salis is

looked upon as one of the few men to

whom so important a post could be

entrusted. His handling of delicate

situations in the past was his best

recommendation when Sir Henry

Howard announced his retirement.
